To Whom It May Concern

Subject: Letter of Recommendation for Aschalew Muleta Dargie

It is my great pleasure to recommend **Aschalew Muleta Dargie**, who has been an outstanding student in the Department of Information Technology, Faculty of Computing, at Bahir Dar University. I had the opportunity to serve as his academic advisor and project supervisor during his BSc. Industrial Project titled “**Merchant Exchange Platform.**”

Throughout the course of his academic journey, Aschalew consistently demonstrated a high level of dedication, curiosity, and technical skill. His contributions to the project were significant, not only in terms of design and development but also in analyzing user needs, optimizing the user interface, and ensuring secure and efficient transaction handling in the platform. He showcased exceptional problem-solving abilities and a deep understanding of both backend and frontend technologies.

He is an independent thinker who always strives to go beyond the classroom theory to explore real-world applications. His approach to learning is proactive, self-motivated, and detail-oriented. During the supervision of the Merchant Exchange Platform project, I witnessed his ability to work collaboratively in a team, manage his time efficiently, and overcome complex challenges with a positive attitude. His eagerness to accept feedback and implement improvements is particularly commendable.

Beyond his academic performance, Aschalew is a person of integrity, discipline, and strong interpersonal skills. He communicates effectively with peers and instructors alike and demonstrates leadership in group settings. His open-mindedness and ability to adapt to new technologies and environments make him exceptionally well-suited for both industry roles and academic advancement.

He has also displayed a keen interest in entrepreneurship and innovation, with aspirations to contribute to Ethiopia’s digital economy. His final year project is a strong example of this vision, as it aims to empower local merchants through digital platforms and financial technologies.

In conclusion, I am confident that **Aschalew Muleta Dargie** would be an outstanding asset to any institution, research program, or company he chooses to join. I highly

recommend him without reservation for further studies, employment, or any opportunities that align with his career aspirations.

I wish him continued success and excellence in all his future endeavors.
